

Acetaminophen (Tylenol) dosing chart:

Give every 4 to 6 hours, as needed. Do not give more than 5 times in 24 hours unless directed by your physician. Do not give *any* acetaminophen to infants under 8 weeks unless directed by your physician!

Child's weight	Child's age	Infant or Children's liquid 160mg in 5ml	Children's Chewables 80mg per tab	Junior Strength 160mg per tab
	0-2 months	<i>Do not give to infants under 8 weeks</i>		
6-11 lbs	2-3 months	1.25 ml		
12-17 lbs	4-11 months	2.5 ml		
18-23 lbs	12-23 months	3.75 ml		
24-35 lbs	2-3 years	5 ml	2 tabs	
36-47 lbs	4-5 years	7.5 ml	3 tabs	
48-59 lbs	6-8 years	10 ml	4 tabs	2 tabs
60-71 lbs	9-10 years	12.5 ml	5 tabs	2.5 tabs
72-95 lbs	11 years	15 ml	6 tabs	3 tabs

Call the office immediately with a rectal temperature of 100.4 or higher in an infant under 8 weeks.

Always use weight-based dosing if you know your child's weight. Use the age-based dosing if you do not know a current weight.
